

7 day mapped trajectories for 04012718 at 57Kft (391K surf); NMC 0 hr fcst

Asterisks indicate locations where Trajectories intersect convection
Squares indicate location of convectively influenced air
Asterisk and square colors indicate age of convection
Trajectory colors indicate temperature along trajectory

961 Trajectories

185 190 195 200 205 210 215

Traj Temperature

Min, Max Traj Temps are 185.272 and 220.121
