Figure 1 is a contour map of the sky showing the intensity distribution of the 21 cm emission from neutral hydrogen. The map is color-coded from blue (low intensity) to red (high intensity). A dashed line indicates the position of the Earth's surface. A solid line with markers at 00:00, 02:45, and 04:26 shows the path of the radio telescope. A rectangular box highlights the region of interest.
