7 day mapped trajectories for 04012418 at 51Kft (372K surf); NMC 0 hr fcst

Asterisks indicate locations where Trajectories intersect convection
Squares indicate location of convectively influenced air
Asterisk and square colors indicate age of convection
Trajectory colors indicate temperature along trajectory

961 Trajectories

Min. Max Traj Temps are 186.620 and 225.029
