7 day mapped trajectories for 04012418 at 57Kft (396K surf); NMC 0 hr fcst

Asterisks indicate locations where Trajectories intersect convection
Squares indicate location of convectively influenced air
Asterisk and square colors indicate age of convection
Trajectory colors indicate temperature along trajectory

961 Trajectories
Min. Max Traj Temps are 185.858 and 220.299
